Says was unaware condition was connected to Tronox product but that is inconsistent with the movant's participation in the prior class action. A supplement filed at docket #8116, says atty Colom failed to file proof of claim. Colom firm handled prior class actions, not clear if was counsel to claimant at time of bar date. In addition, supplemental letters were filed by Billy Wayne Bridges for this group at docket ## 8019, 8068 (with a duplicate at 8391), and 8528 (with a duplicate at 8530) and #9408, and #9432, complaining about the process. Basically, it is a motion for reinclusion in the original Tronox tort claim Class D, which only covered people who actually filed timely proofs of claim before the bar date. Claimants say they were represented by the Creosote Litigation Group of Mississippi since 2002 (Bambach); firm lost records; turned over to Tollison firm after 2009. They appear to confuse the bankruptcy case with the prior class actions and appear to think (without confirmation) that the prior class action counsel was representing them in the 2009 bankruptcy case. Funds for Tort Group D have already been distributed, inclusion in that group is not possible and that request is moot. In addition, attorneys in the Creosote Litigation Group had direct notice of the bar date, so if they actually represented this group then proofs of claim should have been filed. Unexcused failures of counsel are not grounds for relief based on excusable neglect. Motion is denied.

503	TRO885037FTC	11/25/2015	Colvin, Bobby, Jr.	Bobby Colvin, Jr.	7590		X	X				Diagnoses 1986, 2003; former resident of Columbus, MS who still lived there in early 2009 before moving to Tupelo, MS and then to Georgia; says a claim was previously filed with the Colom law firm by parents but says they would have the details, does not state outcome; says he was unaware of the bankruptcy because did not receive direct notice as a known claimant; did not see the publication notice; says was dealing with depression in 2009 which made it difficult to focus on anything including college and work which should qualify as incapacitated; says he should be protected from unforeseen medical issues; says violation of due process but does not explain why; does not provide any supporting docs for depression. No support is provided for the allegation that this movant was a "known claimant." If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. No record that movant was part of a pending lawsuit at the time of the bankruptcy but even if that were the case the attorneys for all pending cases and attorneys for the prior class action plaintiffs received direct notice of the bar date by mail. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
504	TRO884976FTC	11/25/2015	Colvin, Sr. Bobby	Bobby Colvin, Sr.	7368		X	X				1970s diagnosis; previously filed with Colom law firm 2002, outcome not disclosed; says did not file a claim in Tronox bankruptcy prior to bar date because he was unaware of an ongoing case. Also, complains that there are those in the neighborhood who have been rewarded for injuries such as nose bleeds, while he is suffering with many medical conditions and has not been compensated. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claims and legal rights. No evidence the claim was subject to a pending proceeding at the time of the bar date. Claim either was resolved in a prior class action or, if not, was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

However, no explanation of lack of action for many years following the bar date. 515	TRO898082FTC	Unknown	Martin, Bobby	Bobby Martin	7990		X	X			X	Not included in Trust's summary. Diagnoses 1997, 2005, 2009; says previously filed claim with atty Bambach, atty deceased; did not receive anything or any information; filed after learning of process but it was too late. Date of filing with attorney is not specified but Atty Bambach died in 2013. If was retained before bar date that is not grounds for relief based on excusable neglect because Bambach received notice of the bar date and unexcused failures of counsel are not grounds for relief. In addition, claims based on 1997 and 2005 diagnoses were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Date of 2009 diagnosis not clear. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be decided by the Tort Claims Trust under its dispute resolution procedures.

Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. 519	TRO887764FTC	Unknown	Stephenson, Bobby	Bobby Stephenson	6404		X	X				Not included in Trust's summary. Previously filed with Colom law firm in November 2000; says Colom law firm did not inform him that he could file again due to the "second claims file"; says the filing deadline was not reasonably calculated to provide notice to claimants; did not know and no reason to know exposed to a Tronox product; also says was prevented from filing by a natural disaster, but no such disaster is specified. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. No indication Colom firm represented the movant in 2009 but if it did that is not grounds for relief, because the Colom firm received direct notice of the bar date by mail, and alleged failures of counsel are not grounds for relief unless counsel's failures may be excused. Participation in prior proceeding shows awareness of claim and of legal rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Says was wrongly advised on the process of filing a claim and due to that, his initial claim was improperly filed, but does not way when such advice was or by whom, appears to be referring to communications with trust about late-filed claim. Says was not advised he could file a category D claim and was told to complete a category A claim, but category "D" claims were limited to people who filed on or before August 12, 2009. Says claimants were not notified of the tort trust, complains of person who purported to be with the Trust who gave incorrect advice and provided prefilled forms; says wants to be placed in the proper category "D," though by its terms that category is not available. Alleges symptoms and diagnosis after bar date but documents suggest there may have been earlier conditions. Category "D" was closed in 2010 and cannot be reopened, category "A" is the only place where claims may now be filed. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. A notice of appearance filed by counsel at docket #8364 and additional 930 pages of medical records at docket #8365. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures. Trustee contends the motion was not filed within 90 days after Determination Notice, but that deadline is relevant only to the request for relief from the bar date as to pre-bar date claims, movant has only identified post-bar date claims to be pursued.

629	Unknown	#N/A	Unknown	Carl Lee	7695			X				A letter complains that payments were made to claimants who were not ill; complains about procedures followed by trust and the Colom law firm. Mr. Lee has not identified a claim for which he seeks relief and apparently has not made a motion on his own behalf. Contends Trust has been unfair, dishonest and discriminatory in treatment of claims but no specifics are provided and the Court is not aware of any support for such accusations. Asserts that injured parties should be paid and should not be blamed for missing deadlines but the Court is required to enforce deadlines and can only grant exceptions under the standards set forth in the accompanying decision.

837	TRO887049FTC	12/14/2015	Vaughn, Christine	Christine Vaughn	3446	8105		X			x	Says that first learned of Kerr-McGee lawsuit in 2003; she tried to find out where she could get an application. She learned that the Maranatha Faith Center had the application and tried to get one but was told that only church members were able to apply. It was about 11 years before they heard anything, nothing in news or paper, then on April 4, 2014, a big write-up about the settlement and clean up and on April 19, 2015, the WCBI news did an interview with Pastor Steve Jamison, these are the only times she heard about the case. (Given this timing the first references to picking up claims at the Church likely were in the early 2000s and in reference to a class action.) She did not know about a future tort claim until 2015 when a friend said her aunt called to check up on her claim and wanted to know if she could add a condition to her application and they told her to file a future tort claim; "unaware of deadline or that case was still open." A supplement was filed at docket #8105, does not understand why they say her claim was late when it was mailed at same time as others whose claims were allowed; says her diagnosis was after bar date and for others who had same diagnosis date, their claims were allowed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Movant alleges awareness of Kerr-McGee potential fault. This motion is for Junious Bridge as the injured party (TRO891840FTC). 1989 diagnosis; prior claim through Colom law firm; the injured party is deceased. Claimant says did not know about the Tronox process. A supplemental letter filed with others at docket #9268 complaining about the process. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

A supplemental letter filed with others at docket #9268 complaining about the process. A supplemental "group" letter filed at docket #8202 on behalf of 5 claimants complaining about the process, complains that they thought they were represented by class action counsel. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not the subject of a prior proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Unexcused failures of counsel are not grounds for relief based on excusable neglect.

Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Publications complied with due process as explained in the accompanying decision. In addition, attorney Bambach received direct notice of the bar date by mail. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

866	TRO890675FTC	2/23/2016	Turner, Ciara	Ciara Turner	7745		X	X		X		Diagnoses 2000 and 2017; says she had no reason to know exposed to a Tronox product. Trustee contends the motion was untimely but it will be accepted based on the postmark date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

869	TRO899295FTC	7/11/2016	Hairston, Clara	Clara Hairston	6885	8372	X	X				1958 diagnosis; says previously filed a claim in 2002 with her two sisters with attorneys in West Point, MS; one sister received a payment. Clara and the other sister were allotted \$500 each and were told by the agent not to accept it because if they did they "would not be in future court." A supplement filed at docket #8372, consulted a representative in 2002. Reference to 2002 proceeding must be to a prior class action in Mississippi. Participation in prior proceeding shows awareness of claim and of legal rights. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not resolved in a prior proceeding and was not part of a still-pending proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel in all pending cases received direct notice of the bar date.

Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Claim is not a future tort claim just because it continues; claim accrual is based on initial diagnosis. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Standard cut-and-pasted form language as to reasons why missed the bar date. Even if health of decedent near time of bar date would explain failure to file in August 2009 there is no explanation of lengthy post-bar date delay before filing claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 945	TRO905920FTC	4/24/2017	Irions, Bessie	Courtney "Corky" Smith, Esq.	7348	7349	X	X			X	1997 diagnosis; the injured party died in 1998; personal rep did not receive notice of the Tronox tort claims trust settlement and was not aware she could file a claim for the deceased. Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted, but the claim based on the 1997 diagnosis was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing occurred. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Separate legal memo argues that excusable neglect has been shown and that due process relief should be granted, but the claim was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing occurred.

She was informed that the law firm had filed a claim on her behalf. A supplemental letter filed at docket #8210, says the lawyer failed to give the bar date. No record of any bankruptcy claim filed on her behalf. Not clear if Colom firm represented her in 2009 but the Colom firm received direct notice of the bar date by mail. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Given allegation that was a minor, will permit supplemental submission to verify age as of the bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Even if the claim had not expired the motion merely alleges lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1013	TRO895589FTC	3/24/2016	Acron, Curtis	Curtis Acron	6472		X	X				1976 and 1982 diagnoses; says was not notified of an opportunity to file a claim; unaware of "first" round of claims; says retired military but was discharged from military service on November 30, 2005, long before the bar date; says was living in Texas and was not aware of bankruptcy proceedings but became aware of "second round" of claims when he visited Columbus. He says a relative's claim who was in military out of state was approved for processing based on non-notification (out of jurisdiction). Says his own claim not going forward would be a violation of due process. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 1022	TRO887103FTC	12/14/2015	Moore, Curtis	Curtis Moore	3459		X	X				1976 diagnosis, possibly another in 2007. Previously filed with Colom law firm 1999 and received \$411- says he was later diagnosed with a more serious condition in 2007 but Tronox bankruptcy case did not inform him that he was eligible to refile; after hearing about people receiving settlements for lesser conditions and diseases, he inquired for the paperwork. Says Tronox was aware of the original claimants and knew to whom they had made payments but Tronox did not contact him. Prior settlement did not give Tronox reason to know the claimant allegedly had a new claim and did not require additional direct notice. On the other hand, prior claims show claimant's awareness of causal connection and liability. A supplemental letter filed at docket #9443 complaining about the process. If (as alleged) the Colom firm was retained to file a claim by the bar date, and failed to do so, that is not grounds for relief. The Colom firm had direct notice of the bar date, and an unexcused failure by an attorney is not grounds for relief based on excusable neglect. Claim appears to be based on 2011 diagnosis. Merits of any claim based on a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. If the claim was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
1175	TRO90053FTC	7/25/2016	Trimble, Demetrice	Demetrice Trimble	5545			X			X	Form letter also filed by many other claimants alleging that a person claiming to be a representative of the trust instructed what to fill out and form to use and misled them. However, the trust did not exist until long after the bar date, so this must be a reference to the filing of the late-filed claim. Claimant disputes the amount at which the Trust proposed to allow his claim, wants another opportunity to add certain chemicals. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
1176	TRO896645FTC	4/25/2016	Miller, Demetricit	Demetricit Miller	4410			X			X	Diagnosis January 12, 2009. Says did file claim. If contends a timely claim was filed that is an issue to be resolved by the Tort Claims Trust, is not a claim based on excusable neglect or lack of due process. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process.
1177	TRO892995FTC	2/23/2016	Reeves, Demetrics Lowe	Demetrics Lowe Reeves	3838		X	X				1988 diagnosis. Not aware of claim process, never saw "advertisements" in the newspapers. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Prior claim in another proceeding confirms prior awareness of injury and cause. Attorney conduct also is not grounds for excusable neglect or due process relief in the absence of a showing that the attorney's conduct was excusable. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

It appears that the original claim may have mentioned earlier conditions and/or diagnoses, but motion only references alleged condition first diagnosed after the bar dates. Motion does not identify any pre-bar date diagnoses for which relief from the bar date is sought, and so motion for permission to file such claims is denied. The merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Dealings with counsel confirm awareness of legal rights. Trustee contends the motion was untimely but it will be accepted based on the postmark date. Prior dealings with attorney show awareness of claim and legal rights. Unclear if filing with attorneys led to a pending litigation at the time of the bankruptcy but if so direct notice of the bar date was provided to counsel and a proof of claim should have been filed. If claim was not pursued by counsel, that is not grounds for excusable neglect unless counsel's failures are excusable, no such excuse has been offered. Furthermore, if the claims were not part of a pre-bankruptcy litigation then they were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

A supplemental letter complaining about the process filed at docket #8534. Unclear if claim is based on exposure to a harmful substance; appears it is an alleged work-related injury. However, the claim is not based on a pre-bar date diagnosis so a motion for relief from the bar date is not needed or proper. To the extent the claim alleges a condition first diagnosed after the bar date, the merits of the claim, and whether it is of a type covered by the Tort Claims Trust, are to be resolved by the Tort Claims Trust based on its normal dispute resolution procedures.

Claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1425	TRO886605FTC	12/7/2015	Brown, Ella	Ella Brown	7252			X				July 2009 cancer diagnosis; she was incapacitated around bar date and then undergoing treatments including radiation; filed with the Colom law firm in 2002, unclear of the results from that filing. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Dealings with Colom firm show knowledge of legal rights and potential claims. Cancer treatments explain 2009 failure to file by bar date but no explanation as to lengthy post-bar date delays in pursuing rights, admits no claim was filed until October 2015. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

1426	TRO901406FTC	8/16/2016	Selvie, Ella	Ella Selvie	4792		X	X			X	Says was unaware of the information or the possibility of receiving a settlement, includes most recent record of medical visit but does not indicate when certain of the conditions were diagnosed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to conditions diagnosed before the bar date. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.
1427	TRO885481FTC	11/25/2015	Webb, Ella	Ella Webb	7367		X	X				1950s diagnosis; previously filed with the Creosote Litigation Group, which included W. Howard Gunn, William Bambach and William Cunningham; says she thought she really had filed prior to bar date through these lawyers and has been sending information to them since 2002 and they changed with many different lawyers at times. Filing with class action attorneys was in connection with a separate proceeding, was not part of the bankruptcy case. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Unclear if Creosote Litigation Group represented this movant in 2009 but if so they should have filed a claim, because the attorneys with the Creosote Litigation Group received direct notice of the bar date. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Claim either was resolved in an earlier proceeding; or, if subject to a pending proceeding, should have been the subject of a proof of claim; or, if neither of those was the case, the claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1428	TRO886618FTC	12/7/2015	Henry, Ellen	Ellen Henry	3530		X	X				Diagnosed 2001, only states that "there was a death to occur in my immediate family." No allegation of lack of knowledge of bar date, no dates as to death in family, no showing of prompt action and diligence in pursuing rights. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Trustee contends the motion was untimely but it will be accepted based on the postmark date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Alleges misconduct by attorney, but conduct of counsel is not grounds for relief based on excusable neglect or due process unless the attorney's conduct is excused. Prior dealings with attorney show awareness of claim and legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 1442	TRO891965FTC	2/23/2016	Harris, Emma	Emma Harris	3700		X	X				Docket 3700 is actually a motion for Emma Harris; it was mislabelled as a motion for Annie Dixon. The motion for the Annie Dixon claim is actually at docket 4401. Emma Harris was diagnosed in 1996. Gave \$40 to Judy Bulgin (sp?) to file a claim, had an asbestos test done and was told she was not eligible, thought that meant she should file a Tronox claim. Did not fill out other paperwork because she did not understand importance of it. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 1443	TRO900067FTC	7/25/2016	Hudson, Emma	Emma Hudson	5149			X		X		Says someone provided claimant with prefilled forms that were wrong. Letter similar to letter filed at docket #5144. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to conditions diagnosed before the bar date. However, this appears to be a dispute over the Tort Claims Trust's evaluation of the claimant's allegations as to a condition first diagnosed after the bar date, which should be resolved under the Tort Claims Trust's dispute resolution procedures.
1444	TRO880956FTC	12/4/2015	Petty, Emma	Emma Petty	6832		X	X				2000 diagnosis; says previously filed with atty Bambach in 2001 but paperwork was lost. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Also caring for elderly aunt with congestive heart failure and alzheimer's disease and son who has a learning disability; sole caretaker with limited access to communicating with other sources; did not get any information about case from any sources. Insufficient showing of complete inability to file a claim, no explanation of may years' delay after the bar date before a claim was filed. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 1464	TRO895204FTC	3/23/2016	Burgin, Eric	Eric Burgin	5954						X	1987 diagnosis; left Columbus in 1987 to join military; does not provide dates of military service. If military service ended before 2006 then the claim would have been time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Military service would not have tolled the application of the bar date in 2009 unless the movant continued to be in military service at that time. Will permit supplemental submission to verify dates of military service if movant believes that the application of the bar date was tolled due to military service or that the dates of military service justify relief based on excusable neglect. Otherwise, the motion will be denied, as there is an insufficient showing as to factors relevant to excusable neglect relief and as it appears, unless contrary information is provided, that the claim was time-barred under the applicable statute of limitations.

If a claim was stayed by the Tronox bankruptcy then there had to be knowledge of the bankruptcy case and a proof of claim should have been filed, as proofs of service on file show that notices were sent by mail to all pending litigants and/or to their counsel of record. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1505	TRO900972FTC	8/16/2016	Bush, John	Ethel Bush	5611		X	X				1998 diagnosis; the injured party died in 2011; rep says claim was filed in a timely manner but may be under mistaken belief that late-filed claim was timely. Also attaches a form letter that refers to not receiving a "justifiable allowance under the guidance of Colom and Lundy" and refers to secret meetings and minimal information to community. Conduct of Colom and Lundy firm is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Communications among other claimants is not relevant to excusable neglect. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 1508	TRO893677FTC	3/2/2016	Sparks, Ethel	Ethel Sparks	6934			X		X		Says symptoms and diagnosis 2010, unclear if new diagnoses or continuing conditions. Standard cut-and-pasted form language as to reasons why missed the bar date. No pre-bar date diagnosis identified for which relief is sought, therefore no basis for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
1509	N/a	11/28/2017	Stevenson, Ethel	Ethel Stevenson	6971			X		X		Unclear if filed a claim. Motion alleges pre-bar date exposures but says that conditions did not manifest and were not diagnosed until after bar date; says was unaware of the process and did not know could file a claim; was not aware of any publication published in her area. No pre-bar date diagnosis identified for which relief is sought, therefore no grounds for relief based on excusable neglect or due process. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
1510	TRO887707FTC	Unknown	Hinton, Etta	Etta Hinton E.	6178		X	X				Not included in Trust's summary. 1992 diagnosis; previously filed with atty Bambach, late 1990s and case was later turned over to atty Colom; accepted \$375 payment in early 2000s; says did not have knowledge of ongoing Tronox case; did not receive a telephone call, letter or learn anything from media. Claim apparently was already resolved in prior proceeding, and if so it could not be re-asserted in the Tronox bankruptcy case. If claim was not resolved then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In addition, participation in prior proceeding shows awareness of claim and of legal rights, motion alleges lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

1511	TRO884247FTC	11/25/2015	Gadner, Eugene	Eugene Gadner	3363		X	X				Diagnosed 1999, says attorney lost paperwork in 1999. Part of prior litigation. Attorney conduct not grounds for excusable neglect or due process relief without a showing that the attorney's conduct should be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Contact with attorney confirms awareness of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. In addition, claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1512	TRO881013FTC	12/4/2015	Merks, Eugene	Eugene Marks	7544			X				2007 diagnosis; after surgery in September 2007, he was "subjected to CAT scans and doctor appointments every 3 months for the following three years" as well as other consultations and testing. Not a sufficient showing of incapacity and (more importantly) does not explain failure to file a claim for many years after the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
1513	TRO894748FTC	3/23/2016	Suggs, Eugene	Eugene Suggs	5944			X		X		Says symptoms and diagnosis in December 2009; unaware of Tronox tort claim proceeding. 1516	TRO895828FTC	3/24/2016	Smith, Henry	Eva Smith	6744	8071	X	X				The injured party died in 1989; widow was unaware of deadline. Says publication notice was not reasonably calculated to reach claimants. A supplement filed at docket #8071, objects to the statute of limitations defense because the presence of the dangerous chemicals were not discovered until after 1989; says the fact that only 5% of claimants filed prior to bar date establishes that notice was deficient. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Under MS law the statute of limitations begins to run on the date of diagnosis regardless of whether the injured party knows the cause of injury. Claim was time-barred under the applicable statute of limitations many years before the Tronox bankruptcy filing. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
1517	TRO896602FTC	4/25/2016	Walker, Eva	Eva Walker	7770		X	X				Diagnoses 1992 and 2005; says did not know and no reason to know exposed to a Tronox product. Trustee contends the motion was untimely but it will be accepted based on the postmark date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Filed with attorney Howard Gunn in 2002. Attorney told her no action needed, part of 2002 action. There were supplemental letters filed by Billy Wayne Bridges for this party and a group of others at docket ## 7341, 8019, 8068 (with a duplicate at 8391), and 8528 (with a duplicate at 8530) and #9408, and 9432, complaining about the process. They appear to confuse the bankruptcy case with the prior class actions and appear to think that the prior class action counsel was representing them in the 2009 bankruptcy case. The class actions are different proceedings that are not pending in this Court. Claim resolved in prior action could not be reasserted in the Tronox bankruptcy case. If claim was not resolved, and if claimant was represented by the Creosote Litigation Group, then a timely claim should have been filed because attorneys with that group received direct notice of the bar date. Failure of counsel to file a claim is not grounds for relief based on excusable neglect or due process unless failures of counsel can be excused. If the claim was not resolved and was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Prior dealings with attorney show awareness of claim and legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Participation in prior proceeding shows awareness of claim and of legal rights. Even if illness of family member explained failure to file in 2009 it does not explain failure to file until many years after the bar date. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 1563	TRO895075FTC	3/23/2016	Shinn, Florence	Florence Shinn	3487			X		X		Says diagnosed in August 2009; says incompetent at time of claim filing deadline and can't read it; has to have someone do it for her. Unclear if diagnosis was before or after the August 12, 2009 bar date. August 2009 diagnosis might explain reason why August bar date was initially missed but no explanation is provided for the failure to file a claim until March 2016, more than six years after the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect as to claims based on pre-bar date diagnoses. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. If claim was not fully resolved, and was not the subject of a proceeding, then it was time-barred before the Tronox bankruptcy. If the claim was not fully resolved, and was the subject of a pending proceeding, it should have been filed by the bar date, as counsel received direct notice of the bar date. Motion denied.

Roderick	Frances Oden	7555		X	X				Diagnoses 1978, 1984, 2003, 2004; the injured party died in 2007; former resident of Columbus, MS; alleges that a claim was filed with atty Landis Sexton 2003, who represented all of the Maranatha Center claimants and he was supposed to have filed a claim but did not do so (however, the bankruptcy filing did not occur until 2009, so any contemplated claim in 2003 had to be in connection with a different proceeding); it was their understanding that the case was on hold pending the bankruptcy and they would get written notification when the litigation would proceed, but the bankruptcy was six years later, in 2009. Reference to the bankruptcy case suggests knowledge of the proceeding. No indication that claimant was actually a plaintiff in another proceeding, but bar date notices were mailed to all persons in pending cases or, if their addresses were not known, to their attorneys of record. Not clear if attorney Sexton was the movant's counsel when the Tronox bankruptcy case was filed but, if so, a proof of claim should have been filed, as attorney Sexton received direct notice of the bar date by mail, and an alleged unexcused failure by counsel is not grounds for relief based on excusable neglect. 1662	TRO899026FTC	6/27/2016	Williams, Geraldine	Geraldine Fields Williams	6546		X	X			X	<p>Various diagnosis dates, most before the bar date but some after; unaware of the bankruptcy case and the claims filing deadline; lacks knowledge how to complete a claim and "not knowing all chemicals"; heard about it in 2016; was given a contact to a lady portraying to represent Garretson Trust and says she requested to be compensated to assist in filling out the claim. The claimant says that because she did not know the chemicals to which she was exposed and had no clue which form to fill out or how to fill it, the form was provided to her and she was instructed what to fill out. The purported Garretson lady informed her to document a chemical that was not involved in this settlement. The claimant wants to now be allowed to file a claim with these other chemicals as the cause of their condition. She sent the same letter many others sent about this pre-filled form directing them to file for category A chemicals rather than category d and now they want to refile claims. References to Category A and to Category D may be to creditor classifications under the confirmed plan; Category D, however, was available only for persons who filed claims before the bar date, and the only assets still available for claims are those set aside for Category A. 1862	TRO893556FTC	2/23/2016	Perry, J. P.	J. P. Perry	4846		X	X				Diagnoses in childhood (1960s or so); unaware of bankruptcy case; when worked at Kerr-McGee, they did not tell him about the harmful chemicals; says hospital does not have medical records for years at issue. Claim was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing. Even if the claim had not been time-barred, the motion alleges a lack of actual knowledge but makes no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

A supplement filed at docket #8288, says did not know or hear anything about filing a claim with Tronox in 2012, first learned of it in 2017 with future tort claim. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Connection to creosote of many of the conditions listed (contusions, soft tissue injuries) is not clear. Claims that did not know of exposure to Tronox products. Alleges lack of knowledge of bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of legal rights and claims), not sufficient for relief based on excusable neglect or due process as to claims based on conditions diagnosed before the bar date. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. 1880	TRO889225FTC	2/23/2016	Bolton, Jimmy	Jacqueline Bolton	4391		X	X				1990 diagnosis. Unaware of the claims process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 1881	TRO896688FTC	4/25/2016	Bradford, Jacqueline	Jacqueline Bradford	6880		X	X				1989 diagnosis; former resident of Columbus, MS who still lived there in 2009; says claim was filed (unclear in what proceeding) but was told by attorney that paperwork could not be located. By then, the deadline had passed. Also told that because he did not live in Columbus, MS, it would be a waste of time to file after the claim expiration date; does not say who gave that advice, but reference to residency suggests these conversations may have related to prior class action. In any event, the claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
1882	TRO893149FTC	2/23/2016	Coleman, Jacqueline	Jacqueline Coleman	3836	4823	x	X				1985 diagnosis but recurrence of tumors after bar date. Was unaware of exposure prior to deadline. She and her physicians did not know of connection to creosote. Says did not have access to any of the publications with notice, but notice was published in the Commercial Dispatch in Columbus. Also says notice only allowed 52 calendar days or 36 business days to file a claim and that was unreasonably short, but that does not explain why she filed no claim until more than six years after the bar date. Says did not know and no reason to know exposed to a Tronox product; she says that "unlike the case heard by the court in Standard Bank who heard about the contamination in October 2012 and did not file until September 2014" she says that when she learned of it in 2015, she filed immediately. A supplemental form was filed at docket # 4823. Suggests she consulted with physicians about causal connection and was unaware of creosote link. However, connections between creosote exposures and health issues were the subject of widespread publicity in Columbus, MS beginning in 1999. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

She does not subscribe to any of the publications or know anyone in those nearby cities she lives in Georgia and had no knowledge of the notice until a family member informed her. Complaints about amount of time between the publication date and the bar date do not explain the many years' delay after the bar date before a claim was filed. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Complaints about short amount of time before the bar date do not explain or justify the claimant's seven-year delay before making a claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. 1902	TRO885654FTC	11/25/2015	Moore, Jamal	Jamal Moore	4868						X	2002 birth and diagnosis; minor; rep says unaware of bankruptcy case. Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
1903	TRO892218FTC	2/23/2016	Spencer, Jamal	Jamal Spencer	5838		X	X				1995 diagnosis; was not aware of any proofs of claims in Tronox proceeding in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
1904	TRO886396FTC	12/7/2015	Harris, Jamar	Jamar Harris	3315		X	X				Date diagnosed is "yes." Alleges did do paperwork in 1999, but it was lost by attorney William Bambach, who is deceased. Mr. Bambach did not die until long after the bar date. Attorney error also is not proper ground for excusable neglect or due process relief. Prior paperwork likely was in connection with different legal proceeding as Tronox bankruptcy was not filed until 1999. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Prior dealings with counsel confirm movant's awareness of legal rights and claims. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. In addition, claims that had accrued as of 1999 were time-barred under the applicable statute of limitations by the time of the Tronox bankruptcy filing in 2009.
1905	TRO887034FTC	12/14/2015	Jones, Jamarcus	Jamarcus Jones	4440						X	1993 and 2006 diagnoses. Minor, says not aware exposed to Tronox product, but no explanation of parents' or guardian's knowledge or actions or their diligence in pursuing rights and claims. Will permit supplemental submission to verify age at bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
1906	TRO893958FTC	3/2/2016	Summerville, Jamaya	Jamaya Summerville	5473						X	Minor at the time of the bar date, apparently born in 1999; did not know and no reason to know exposed to Tronox product; discharge of claim is a violation of due process. Will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

James Shelton alleges in the motion at docket #7221 that his son received a 2015 diagnosis; also says he previously filed with the Colom law firm in the 2002 class action, outcome undisclosed; unclear if this claim is filed on behalf of James Shelton as the injured party or if it seeks compensation for his child. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process as to pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be decided by the Tort Claims Trust under its dispute resolution procedures.
2191	TRO901666FTC	8/16/2016	Lyons, Uluster	Johnny Lyons	6354		X	X				2001 diagnosis; the injured party died in 2001; rep says that the injured party did not know and had no reason to know that he had been exposed to a Tronox product in the years before the bar date. Statute of limitations in Mississippi runs from date of known injury, regardless of whether cause of the injury was known. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Conduct of counsel or counsel's employee is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. 2204	TRO899044FTC	6/27/2016	James, Jonathan	Jonathan James	4121		X	X				1966 Diagnosis. Previously filed with atty Gunn 2002-2005; neither atty nor he received notice of bar date. Claim apparently was part of prior litigation. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Dealings with counsel confirm awareness of claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

From 2005-2010 was stationed in various places, including abroad. Military service ended in July 2010. Even if application of the bar date was tolled by 50 U.S.C. 3936 that would still have required a claim no later than late September or early October 2010, actual claim was not filed until much late. Does not explain lengthy delays given diagnosis dates and long-running conditions. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2207	TRO888309FTC	12/18/2015	Mitchell, Jonathan	Jonathan Mitchell	5516		X	X				Says diagnosis dates were "12/1983-1/01/1985"; says no reason to know could file a claim; learned of it when people started receiving compensation. Also refers to "newspaper ads about the Tronox settlement and how they had money for people to file claims," apparently is referring to articles that prompted the filing of the late-filed claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief. 2208	TRO900251FTC	7/25/2016	Moore, Jonathan	Jonathan Moore	5534		X	X				1982 diagnosis; says filed documents in a timely manner, but appears to be referring to answers to questions by Tort Claims Trust; filed form letter saying that she contacted Garretson and was told a record of her claim was not in the system. She says that she "was not given justifiable allowance under the guidance of Colom and Lundy;" refers to secret meetings, minimal information to community. Allegation that some claimants had meetings without telling others is not a basis for relief. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. A supplement at docket # 8298 without knowledge to wade through process. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. If claim was not resolved in a prior proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of PA starting in 2001. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2230	TRO902437FTC	9/14/2016	Taylor, Joseph	Joseph Taylor	5802		X	X				2000 diagnosis; had no knowledge of a claim to file against Tronox nor did he know about a deadline; was totally unaware of this claim; moved to another city. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2231	TRO893600FTC	2/23/2016	Williams, Joseph	Joseph Williams	6665			X		X		Diagnosed 2012; did not know about the case in 2009. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.
2232	TRO904051FTC	1/3/2017	Williams, Josephine	Josephine Williams	7542		X	X				1973 diagnosis; place of exposure not clear; says notice was deficient on its face (does not explain why); says notice was not reasonably calculated to provide notice to potential claimants who were unknown at the time of notice (does not say how); says did not know and no reason to know exposed to a Tronox product. Publication notices were reasonable and complied with due process for the reasons stated in the accompanying Decision. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2235	TRO892265FTC	2/23/2016	Fenster, Joshua	Joshua Fenster	4535		X	X				1984 diagnosis. Says that in 2009 had a proceeding against Tronox but did not personally get anything from Tronox, nor a written notice of the bar date. A rejection notice filed at docket # 7825. No record of 2009 proceeding but counsel in all such proceedings were given direct notice of the bar date and claimants in pending proceedings were given direct notice if their addresses were known. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2237	TRO891823FTC	2/23/2016	Hibbler, Joshua	Joshua Hibbler	7639			X			X	Lists diagnoses in 2010 and 2016 but prior diagnoses clear from records; says that previously filed with Colom law firm, Cochran, Hunter Lundy & Davis, Richmond Simon & Agston, Hamilton Sexton & Berry 2001; says did not receive direct written notice of bar date although had commenced a legal proceeding against Tronox, but there is no indication that 2001 proceeding was still pending at the time of the bankruptcy filing, and in any event the referenced attorneys received direct notice of the bar date. When he learned of Tronox tort claim trust contacted atty and was told paperwork lost. Also asserts due process claim because publication notice not reasonably calculated to provide notice; says did not see publication notice and was not aware of the bar date or of the bankruptcy case and therefore says did not receive sufficient notice to file a timely claim. If pre-bar date claim was resolved in a prior action it could not be asserted in the Tronox bankruptcy. If it was not part of a pending action, it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In those instances, publication notice would have been appropriate because Tronox would have had no reason to know that the claimant had an unresolved claim. If the claim was the subject of a still-pending litigation, then a proof of claim should have been filed, as notice by mail was provided to all plaintiffs in pending litigations (or to their counsel if the plaintiffs' addresses were not known), and the proof of service on file shows that the listed attorneys received notice of the bar date. Notice sent to counsel is imputed to the client. Failure by counsel to file a claim is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Any claim as to a condition first diagnosed after the bar date (and any defense based on terms of resolution of prior action) is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. 2254	TRO897447FTC	5/25/2016	George, Michael	Joyce George	5875			X				1980s diagnosis; the injured party died in 1992; rep says that she did file paperwork prior to bar date and in the beginning was told the Powell law group would be handling the claims. When she heard that the Powell law group would not be handling it any longer, she called the 800 number (Garretson), but that must have been long after the bar date because the trust was not established until after the plan was confirmed. After inquiring several times was later told they did not have any paperwork and she should file again. To the extent that the movant alleges a failure by the Powell law group, as counsel, that is not grounds for relief based on excusable neglect unless the failure by the Powell law group can be excused, and no excuse has been offered. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

2255	TRO899218FTC	7/11/2016	Lee, Joyce	Joyce Lee	4949			X			X	Says previously filed without an atty but the paperwork was filled out incorrectly, is probably referring to a late-filed claim. The claimant does not provide date for diagnosis, but it appears that the medical records refer to conditions after bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to conditions diagnosed before the bar date. 2257	TRO900370FTC	7/25/2016	Parson, Earnest	Joyce Parson	7566		X	X				1991 diagnosis; the injured party died in 1992; rep says previously filed with atty Jeffery M. Navarro 1994 in district court case no. 96-CV-00076; the attorney did not provide updates after several telephone calls, claimed the building burned down containing all records and advised that she had no recourse; she was not aware and had no knowledge of the Tronox bankruptcy. No record that movant was a plaintiff in a case pending at the time of the bankruptcy. Prior dealings with attorney show awareness of claim and legal rights. Conduct of counsel is not grounds for relief based on excusable neglect unless counsel's conduct can be excused. Claim either was resolved in a prior litigation or, if not, it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2258	TRO901748FTC	8/16/2016	Parson, Joyce	Joyce Parson	7663			X			X	Supporting records suggest diagnosis for all conditions after bar date; former resident of Columbus, MS; says did not know of the Tronox bankruptcy case, did not see any published reports. Trust contends motion was untimely because it was not docketed within 90 days after the Determination Notice but the motion actually seeks no relief based on any pre-bar date diagnoses so the timing is irrelevant. Any claim as to a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2305	TRO903502FTC	11/23/2016	Cunningham, Kailey	Kaneshia Dobbs	5901			X			X	Form letter also filed by many other claimants alleging that a person claiming to be a representative of the trust instructed what to fill out and form to use and misled them. However, the trust was not formed until long after the bar date so this does not excuse a late filing. Claimant disputes the amount at which the Trust proposed to allow the claim. Contends that people whose conditions continued after the bar date (even if diagnosed earlier) should be entitled to file Future Tort Claims, which is incorrect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2316	TRO887727FTC	12/14/2015	Murray, Katherine	Katherine Murray	4783	5022	X	X				Diagnoses 1989 to present (unclear if any new conditions after bar date); did not know symptoms were caused by Tronox product; says previously filed with Garretson in 2007 but that is obviously not a reference to the bankruptcy process, as the bankruptcy case was not filed until 2009. Supplement filed at docket # 5022; rep says filed earlier in 2007 without details, says was unaware exposed to dangerous Tronox chemicals and condition from it. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. No record of any lawsuit against Tronox or other claim allegedly filed in 2007. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing and before the alleged 2007 filing of a claim.
2317	TRO894952FTC	3/23/2016	Wells, Katherine	Katherine Wells	7769		X	X			X	Diagnoses 1980, 2000, 2010 (pace maker); did not know and no reason to know exposed to a Tronox product; there was a lot of misinformation about the exposure of creosote; challenges whether notices were sent in compliance with court orders, but the notices were mailed and published by an independent noticing firm retained by the clerk's office and affidavits attesting to compliance were duly filed. Claims that people in place to answer questions (unclear to whom referring) deliberately told individuals that they were only affected if they lived near the plant and as she did not reside within the noted radius, she thought she could not have been exposed to the product; this likely was a communication in relation to a prior class action that was on behalf of residents who lived within a certain distance of the plant. Trustee contends the motion was untimely but it will be accepted based on the postmark date. Claims based on 1980 and 2000 diagnoses were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim based on a 2010 diagnosis (for pacemaker) is to be resolved by the Tort Claims Trust under its dispute resolution procedures.

Given onset of symptoms in 1977 the claimant was no less than 41 years old at the time of the bar date, no showing as to incompetence or infancy and no showing of why claimant could not file a claim. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge of bar date but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. A supplement filed at docket #8257, says paperwork to Tronox was timely filed in 2016. When first heard of lawsuit, thought it was just for those living in a particular town, she did not realize it was for company's plant. She filed and it was handled by a lawyer in Aberdeen, she did not receive any money. Prior consultation with attorney shows awareness of legal rights. The motion at docket 4503 alleges diagnoses in 2007, but movant also contends she previously filed with the Colom law firm in 2003. Says did not receive notice of bar date. Participation in prior proceeding shows awareness of claim and of legal rights. Proof of service shows direct mailing of bar date notice to the Colom law firm, so if movant was represented by that firm in 2009 direct notice was provided. Katrice Stewart Ward	4504		X	X				There are actually two separate motions for this TRO claim number; the first is for Katrice Stewart, which is on the docket at claim #4503, and the second is for Dominique Stewart at docket # 4504. The motion at docket 4504 alleges diagnoses in 1987 and 2006. Movant also contends she previously filed with the Colom law firm in 2003. Says did not receive notice of bar date. Claims was a child, but also says exposure began in 1987 and diagnoses were in 1987, so movant had to be approximately 22 years old at the time of the bar date in 2009. Participation in prior proceeding shows awareness of claim and of legal rights. Proof of service shows direct mailing of bar date notice to the Colom law firm, so if movant was represented by that firm in 2009 direct notice was provided. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Merits of any claim based on a condition first diagnosed after the bar date is to be resolved by the Tort Claims Trust under its normal dispute resolution procedures.

Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect as to pre-bar date diagnoses. 2336	TRO904998FTC	1/24/2017	Scott, Kawanis	Kawanis Scott	3773		X	X				Former resident of Columbus, MS. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. However, although the claimant did not seek relief based on infancy it appears possible the claimant was a minor at the time of the bar date. Injured party is a minor and lived out of state in S.C.; unaware of exposure to dangerous Tronox product. Will permit supplemental submission to verify age as of the bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

2369	Unknown	11/25/2015	Dent, Kendall	Kendall Dent	7875		X					Minor at time of bar date (19); no current condition and unaware exposed to deadly chemicals; wants to preserve right regarding latent illnesses. No pre-bar date diagnosis or condition identified for which relief is sought, no basis for relief from bar date because no claim for which relief is appropriate.
2370	TRO887043FTC	12/14/2015	Jones, Kendall	Kendall Jones	7535	X	X					Diagnoses 1997, 1998, 2000; says was unaware of the process and did not know could file a claim; says violation of due process but does not say how. 2372	TRO998695FTC	12/4/2015	Bridges, Kendrick	Kendrick Bridges	3786	7341 8019 8068 8391 8528 8530 9408 9432	X	X				1976 diagnosis. Part of a group of Columbus MS claimants. Says filed with attorney in 2002, wasn't told the attorney dropped out. There were supplemental letters filed by Billy Wayne Bridges for this party and a group of others at docket ## 7341, 8019, 8068 (with a duplicate at 8391), and 8528 (with a duplicate at 8530). The letter filed at docket #7341 by Billy Bridges on behalf of various claimants complaining as to how the attorneys representing them in the class actions handled their case and requesting that payment to the attorneys get frozen until they certify as to the way they handled the claimants' documentation. Movants appear to confuse the bankruptcy case with the prior class actions and appear to think that the prior class action counsel was representing them in the 2009 bankruptcy case. There are additional supplements filed at docket #8019, 8068 (with a duplicate at 8391), 8528 (with a duplicate at 8530) and #9408 and #9432, complaining about the process. The class actions are different proceedings that are not pending in this Court. Prior filing in class action does not constitute a filing in the bankruptcy case. Claims resolved in prior action could not be reasserted in the Tronox bankruptcy case. If the claim was not resolved and was not the subject of a pending proceeding then it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. If the claim was the subject of a still- pending proceeding, it should have been filed by the bar date, because counsel received direct notice of the bar date. Complaints that attorneys with Creosote Litigation Group should have filed claims on their behalf is not grounds for relief based on excusable neglect in the absence of a showing that counsel's failures can be excused.
2373	TRO891228FTC	2/23/2016	Danner, Kenishaa	Kenishaa Danner	7100			X				The motions at dockets 7100, 7101 and 7102 were filed by three different persons but with the same address in Columbus, Georgia; the motion at docket 7101 indicates that exposures occurred in Columbus, Mississippi but the other two motions are not clear as to where exposures occurred. The motion at docket #7100 alleges a 1990 diagnosis; says never received any notice. Alleges notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

Refers (without date) to awareness of reports that Kerr-McGee/Tronox chemicals caused injuries and illness. Does not explain failure to file by bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2426	TRO885465FTC	11/25/2015	Webb, Kimberly	Kimberly Webb	7364			X				Diagnosed in childhood (late 1980s or early 1990s); previously filed with atty Gunn in 2002; says she already sent her medical records to William Howard Gunn and others in the group. Seems to think the bankruptcy process is a continuation of prior class action, which is not the case. If claim was resolved in a prior proceeding it could no longer be asserted in the Tronox bankruptcy. Participation in prior proceeding shows awareness of claim and of legal rights. Apparently was 20 years old as of the bar date but does not explain why movant and movant's representative did not file a claim, does not explain long delay after the bar date before filing a claim. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2427	TRO889687FTC	2/23/2016	Williams, Hazel	Kimberly Williams	5535		X	X				1953 diagnosis; the injured party died in 2004; place of exposure not specified; standard cut-and-pasted language as to reasons why missed the bar date. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2428	TRO903724FTC	11/23/2016	Sharp, Susie	Kimbrley Dooley	3904		X	X				1999 diagnosis. Filing for another person, claims filed with William Bombach in 1999 and her papers were lost. Participation in prior proceeding shows awareness of claim and of legal rights. Conduct of counsel is not grounds for relief based on excusable neglect or due process unless counsel's conduct is excused. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

2429	TRO904272FTC	1/3/2017	Silvers, Kimmely	Kimmely Silvers	4529		X	X				1997 diagnosis. Says notice not reasonably calculated to give notice. Alleges publication notice was not reasonable but no showing that Tronox had reason to know of claimant, no specific challenge to the publication notices that were approved in 2009. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2430	TRO892469FTC	2/23/2016	Oden, Pope	King Nelson Oden	7557		X	X				Diagnoses 1955, 1961, 1968; the injured party died in 1970; former resident of Columbus, MS; rep says previously filed with atty Landis Sexton who represented all of the claimants of the Maranatha Center and who was supposed to file a claim; it was their understanding that the case was on hold pending the bankruptcy and they would get written notification when the litigation would proceed. No indication that claimant was actually a plaintiff in another proceeding, but bar date notices were mailed to all persons in pending cases or, if their addresses were not known, to their attorneys of record. Not clear if attorney Sexton was the movant's counsel when the Tronox bankruptcy case was filed but, if so, a proof of claim should have been filed, as attorney Sexton received direct notice of the bar date by mail, and an alleged unexcused failure by counsel is not grounds for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

2464	Unknown	7/25/2016	Walker, Ibe	L. Nichole Clinkscales, Esq.	7949		X	X	X			1990 and 2001 diagnoses; unaware condition related to Tronox chemicals; notice insufficient to provide notice of litigation or that condition was related to Tronox. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Claim was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In addition, the motion itself was untimely as it was not dated or filed within the 90 day period required under the procedures approved by the Court and set forth in the Determination Notice.
2465	Unknown	12/14/2015	Spencer, Kenneth	L. Nichole Clinkscales, Esq.	7950						X	1996 diagnosis; minor (18) at bar date; says exposure began in 2005 but says symptoms began in 1996 and were diagnosed in 1996; unaware exposed to deadly Tronox chemicals; notice insufficient to provide notice of pending litigation or that condition was related to Tronox. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Motion was not filed within 90 days after Determination Notice as required by the Court's prior order and as specified in the Determination Notice, but court nevertheless will permit supplemental submission to explain reasons why parents or guardians did not file a claim by the bar date, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
2466	Unknown	7/25/2016	Thomas, Diane	L. Nichole Clinkscales, Esq.	7951		X	X	X			Diagnoses 1999, 2000; did not know her condition was related to Tronox chemicals; did not receive notice, published notice insufficient to put her on notice of the connection of her illness to Tronox products. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. In addition, the motion itself was untimely as it was not dated or filed within the 90 day period required under the procedures approved by the Court and set forth in the Determination Notice.
2467	Unknown	2/23/2016	Pratt, Shemeka Love Obo Ametrice	L. Nichole Clinkscales, Esq.	7952						X	2003 diagnosis; minor; unaware exposed to deadly chemicals and had no knowledge that the potential exposure causes deadly conditions; did not receive notice of the pending litigation and says form of notice used was insufficient to put her on legal notice of the litigation. Motion was not filed within 90 days after Determination Notice as required by the Court's prior order and as specified in the Determination Notice, nevertheless the Court will permit supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

2468	Unknown	Unknown	Elliott, Jr., George	L. Nichole Clinkscales, Esq.	7955		X	X				Not included in Trust's summary. Diagnoses 1996, 1997, 2000; unaware condition related to Tronox chemicals; notice insufficient to inform of litigation or that condition was related to Tronox. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2469	Unknown	Unknown	Harris, Marilyn	L. Nichole Clinkscales, Esq.	7956		X	X				Not included in Trust's summary. Diagnoses 1970, 2006; previously retained Colom law firm and was paid \$2,500, but does not believe this was enough; unaware that attorney would not file on her behalf; attorney did not get notice; notice insufficient to provide notice of litigation. Claim resolved in prior litigation could not be re-asserted in Tronox bankruptcy. Participation in prior litigation shows knowledge of Tronox connection to ailments. No indication that Colom firm represented claimant in 2009, but in any event the Colom firm received direct notice of the bar date and actively participated in the bankruptcy case. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2470	Unknown	Unknown	McGee, Sharron	L. Nichole Clinkscales, Esq.	7957			X				Not included in Trust's summary. No current condition and unaware exposed to deadly chemicals; wants to preserve right regarding latent illnesses. No pre-bar date diagnosis or condition identified for which relief is sought, no basis for relief from bar date because no claim for which relief is appropriate.
2471	Unknown	Unknown	Washington, Tylesha	L. Nichole Clinkscales, Esq.	7958						X	Not included in Trust's summary. Diagnoses 1996; minor (12) at bar date; unaware condition related to Tronox chemicals; says notice insufficient to advise claimant of litigation and to let claimant know that claimant's condition was due to Tronox. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. The Court will permit a supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

2472	Unknown	Unknown	Porter, Nakeria	L. Nichole Clinkscales, Esq.	7959						X	Not included in Trust's summary. Diagnoses 2002, 2003, 2005 2007; minor (15) at bar date; unaware condition related to Tronox chemicals; says notice insufficient to tell claimant of litigation and that condition was related to litigation. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. The Court will permit a supplemental submission to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.
2473	Unknown	3/24/2016	Crowell, Antonio	L. Nichole Clinkscales, Esq.	8428		X	X				1995 diagnosis; previously filed claim with Colom law firm, was paid \$500, does not believe was fairly compensated. Says was unaware that "my attorney" would not file a claim on his behalf - unclear who attorney was at that time, but apparently is referring to the Colom firm. Claim resolved in a prior class action could not be reasserted in the Tronox bankruptcy case, and if some part of the claim was not resolved in the class action it was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Unclear if Colom firm was counsel to claimant in 2009 but even if it was that would not be an excuse, because the Colom law firm received direct notice of the bar date. Allegation that Colom firm should have filed a claim is not grounds for relief, because unexcused failures by counsel are not grounds for relief based on excusable neglect.
2474	Unknown	2/23/2016	Jones, Earnisha	L. Nichole Clinkscales, Esq.	8463		X	X				1999 diagnosis; says unaware condition related to Tronox product; says notice was insufficient to let claimant know that condition had been caused by Tronox. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

2475	Unknown	12/4/2015	Little, Titus	L. Nichole Clinkscales, Esq.	8470	9147		X				1996 diagnosis; minor (18) at bar date; unaware condition related to Tronox product, says notice not sufficient to inform claimant that condition was due to Tronox. A supplemental letter filed at docket #9147 complaining about the process. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. No explanation of long post-bar date delay before filed claim, no explanation of any efforts to investigate or to protect legal rights during that time. Movant was 21 years old by approximately 2012, no claim filed until years later. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2476	Unknown	3/24/2016	Mason, Ebbie	L. Nichole Clinkscales, Esq.	8474	8959	X	X				Diagnoses 1976, 1990; previously represented by Bambach and received a \$300 settlement, which he says was not fair compensation; says notice was insufficient to inform him that Tronox caused his illness, but participation in prior litigation shows notice of that connection. A supplemental letter filed at docket #8959 complaining about the process. Claim resolved in a prior action could not be reasserted in the Tronox bankruptcy case. Claims either were resolved in prior action or, if not, were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2477	Unknown	2/23/2016	Mason, Joe	L. Nichole Clinkscales, Esq.	8475		X	X				2005 diagnosis; unaware condition related to Tronox product; insufficient notice to inform claimant that Tronox caused injury. No indication that Tronox had reason to know of the injured party's condition. Due process did not require the impossible and did not require that Tronox send notice to each injured party saying that the injured party had a condition that Tronox had caused. Statute of limitations in Mississippi runs from date of known injury regardless of whether cause is known. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2478	Unknown	2/23/2016	Mason, Joe Kris	L. Nichole Clinkscales, Esq.	8476			X				Says has no symptoms now but wants to file in case latent condition turns up later; unaware of dangerous chemicals. No pre-bar date diagnosis identified for which relief from the bar date is sought or is necessary.

2479	TRO900507FTC	8/16/2016	Lowe, L.C.	L.C. Lowe	5102		X	X			X	Standard form language regarding reasons for delay; form says first diagnosis in 1985, attachments only refer to conditions after 2015. To the extent the conditions were diagnosed in 1985 the claim is time-barred. To the extent other conditions were diagnosed before the bar date there is an insufficient showing as to relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. To the extent the claim alleges new post-bar date diagnoses of different conditions, the merits of that claim and any defenses to it are to be resolved under the Tort Claims Trust dispute resolution procedures.
2480	TRO900838FTC	8/16/2016	Hester, L	L.E. Hester	4599		X	X				Diagnoses in 1975 and 1996. Says was unaware of exposure to Tronox product. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2481	TRO912171FTC	5/30/2017	Hardy, Michael	L.H. Hardy	3791	8313	X	X				1980 diagnosis. Says "I was informed of the claims process" but presumably means "not informed." A supplement filed at docket #8313, without knowledge to wade through the process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.
2483	TRO887068FTC	12/14/2015	Wilson, La Sharra	La Sharra Wilson	4334						X	1995 and 2001 diagnoses. Minor, unaware exposed to chemicals. Filed claim in 2015. Will permit supplemental submission to verify age at bar date and to explain reasons why parents or guardians did not file, why claimant waited so many years after the bar date before filing a claim, and whether relief is warranted.

2484	TRO886783FTC	12/7/2015	Teal, La Wanda	La Wanda Teal	7407			X				1966 diagnosis; says that the publication notice was not reasonably calculated to provide notice to her as she lived in Oklahoma; she was not aware of the lawsuit through reasonable means of publication, local or otherwise, prior to the bar date; without knowledge of the lawsuit, she did not know or have reason to know she had been exposed to a Tronox product; when she learned of it, she became aware that conditions were caused by Tronox product; responsible parties neglected to ensure that those who relocated received notice. The court approved notices in 2009 that included publication in local newspapers where plants were located and also in national edition of Wall Street Journal. Former creosote plant was located in Hugo, OK and notices of the bar date were also published in (1) the Oklahoman in Oklahoma City, OK, (2) the Hugo Daily News/Choctaw County Times in Hugo, OK, (3) the Cleveland American in Cleveland, OK, and (4) the Tulsa World in Tulsa, OK. Publication notice was reasonable and consistent with due process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2485	TRO887551FTC	12/14/2015	Reives, Gladys	LaBaron Fenton	4199		X	X				1990 diagnosis. Previously filed with atty Bambach (deceased) in 2006. Tried to reach out to atty but did not respond. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Dealings with attorney confirm awareness of claim and of legal rights. Conduct of counsel is not grounds for relief based on excusable neglect or due process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in pursuit of claims and reasons why filed so long after the bar date), not sufficient for relief based on excusable neglect. Claim also was time-barred under the applicable statute of limitations before the Tronox bankruptcy filing.

Complaint to DOJ did not constitute a proof of claim filing in the bankruptcy case. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. 2508	TRO884191FTC	11/25/2015	Hill, Landrick	Landrick Hill	7151			X		X		Says was unaware of claim filing date. It is difficult to read the medical records but it appears that certain diagnoses were prior to the bar date because claimant says that had he known of deadline, he would have put down "other medical records with the dates pertaining to your deadline dates and after the deadline dates." Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. Claims based on conditions diagnosed before 2006 also were time-barred under the applicable statute of limitations before the Tronox bankruptcy filing. Merits of any claim alleging conditions first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2534	Unknown	3/2/2016	Marlowe, Larry M.	Larry Marlowe	5183			X			X	The motion at docket #5183 is on behalf of Larry M. Marlowe though the form that was used is one that was prepared for Ricky Lee. The motion actually filed on behalf of Ricky Lee [TRO893766FTC] is at docket # 6769. A motion by another movant named Larry Marlowe (apparently a different claimant, with a different address) is at docket # 1924. Larry M. Marlowe's excuse in the motion at docket #5183 is that he previously filed with atty Howard Gunn in 2008; says did not file a claim because he was in car wreck and was in the hospital, does not assert specific dates for car wreck or insert any medical records as to hospital stay. Also says symptoms were 2008 and diagnosis 2013 but that may be inconsistent with having filed with atty in 2008. No explanation of why attorney could not file or why nothing was filed until many years after the bar date. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.
2536	TRO885399FTC	Unknown	Martin, Larry	Larry Martin	7994			X			X	Not included in Trust's summary. 2008 and 2009 diagnoses; says previously signed up with atty Bambach (deceased), but atty Bambach did not die until 2013, that is no reason why bar date was missed; unaware of last time they did claims or that could sign up. If the allegation is that Bambach was retained in 2009 that is not enough; unexcused failure of counsel is not grounds for relief based on excusable neglect or due process. Does not allege lack of knowledge of bar date, contains no showing to support relief based on excusable neglect or due process and to pre-bar date diagnoses. Merits of any claim based on a condition first diagnosed after the bar date are to be resolved by the Tort Claims Trust under its dispute resolution procedures.

2566	TRO890987FTC	2/23/2016	Epps, Latanya	Latanya Epps	6110		X	X			X	1973 diagnosis; previously filed with the Colom law firm in 2001 and the J. Douglas Dalrymple firm in 2003; says that filed a claim by the deadline [apparently under mistaken belief that the 2016 claim was timely], however the claim was filled out incorrectly. The claim was filled out using illness starting in 1973 rather than 2009. The reason being that claimant filed a claim with Colom in 2001. There was a settlement in 2002 that did not compensate for injuries, illnesses or diagnoses. In 2003, filed a claim with the Dalrymple law firm. A year later the atty decided to drop the proceedings. Now wants consideration as a future tort claimant. Continuation of a prior condition is not a future tort claim. Participation in prior proceeding shows awareness of claim and of legal rights. If claimant believes that she actually filed a timely claim in 2009 she may raise that issue with the Tort Claims Trust but that does not represent a request for relief based on excusable neglect or due process.

Says that to bar her future tort claim violates her due process rights because she did not receive notice of the lawsuit and the 2009 deadline; says that public notice provided was not sufficient for her case because she did not live in the local newspaper area at the time notice was made. She says that some conditions were diagnosed prior to the bar date and some after. 2677	TRO895866FTC	3/24/2016	Tellis, Leroy	Linda Latham	7230	7231	X	X				The injured party died in 2006; rep says injured party was not living in a certain area therefore thought that he did not qualify; did not know that he qualified; did not know or had reason to know exposed to a Tronox product. Separate legal memo argues that claimant is entitled to relief based on excusable neglect but only addresses lack of knowledge and not other factors, including length of delay, diligence in pursuit of claim and effect on proceedings. Also argues that due process required direct notice but does not allege that Tronox had knowledge of this claim or this claimant and does not criticize the publication notices that were approved in 2009. Movant's mistake as to whether people qualified who did not live in the area suggests actual knowledge of the claims process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief as to pre-bar date diagnoses. The court approved notices in 2009 that included publication in local newspapers where plants were located and also in national edition of Wall Street Journal. Publication notice was reasonable and consistent with due process. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect.

In addition, false information was imparted saying that only people who worked in the plant could file. No specification of time period. There was an earlier action that apparently was limited to people who worked for Kerr-McGee, that is unrelated to the bankruptcy process. Risks of creosote exposure and filings of claims based on the same were the subjects of widespread publicity in the relevant areas of MS starting before 2000. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. She says that at that during that time she was very sick and unable to walk or stand for a long period of time. She's been unable to walk since 2005. She includes a facts and conclusions statement related to a social security claim. Movant has identified physical limitations but not an inability to file a claim or to enlist the help of others in doing so. Alleges lack of actual knowledge but no showing as to other relevant factors (including diligence in investigation and pursuit of claims and legal rights, reason why filed so long after bar date), not sufficient for relief based on excusable neglect. In addition, under MS law the claim accrues upon diagnosis, regardless of whether the injured party knows the cause of the injury, so this claim was time-barred under the applicable statute of limitations long before the Tronox bankruptcy filing.
